

Don't leave your hard earned profit on the ground.

Did you know that you can lose up to five bushels per acre if your combine isn't adjusted properly for your crop and field conditions? Join us for Picking up Profit; a combine performance clinic where you'll hear expert advice from leading manufacturers as they walk you through the critical adjustments for your combine models. Learn what harvest loss really means in terms of performance, productivity and operating economics at this informative one-day event.

Hear expert advice from leading combine technicians as they walk you through the implications of loss and how you can maximize your productivity. Topics include:

Understanding the implications of loss

- What is the real value of loss?
- What are your real operating costs?
- What does loss mean to your combine?

Finding and quantifying loss

- What loss looks like on the ground
- Catching loss
- Separating the seed
- Measuring the loss

What you can do about loss

- Stopping leaks
- Setting your combine
- Cleaning
- Feed rate
- Conditions in the swath
